Moshiur Rahman

Mr. Moshiur Rahman is a successful and remarkable personality. He has been relentlessly helping out innumerable people in their livelihoods thereby, unceasingly contributing to the welfare of the nation and the country. He was born in January, 1961 at the then Nawab Bari Hosne Dalan, Islampur that is now known as Ahsan Manzil in old Dhaka. However, his domicile residence is in Doulatpur, Cumilla.

He is the fifth among the siblings of four brothers and three sisters. His father, having worked at the British Air Force, before partition, subsequently, endeavoured in the business of printing press. Moshiur Rahman is blessed with two sons and a daughter. The eldest son works alongside the father in business while the younger son completes his degree in Computer Science at the University of British Columbia, Canada. The daughter lives in Canada with her husband as well. Through her father's inspiration, the daughter has mastered the arts of baking and design and established her very own bakery named Pastel Bakes, located in Toronto, Ontario.

Moshiur Rahman got initiated to photography, while at school. In the initial days, he would borrow a camera from friends to take pictures and would diligently try to learn the multi-faceted aspects of the camera. While in class eight, he bought a camera for himself. Among the family members, his father used to encourage him the most in photography. At that time, negatives were used, which then, needed to be printed into a photograph. Thus, he would embark on travels with a stock of film rolls at his disposal. However, due to strenuous involvement with business, he had to take a temporary respite from photography during 1995 – 96. But, can someone who loves photography, remain aloof from it for long? Thus, he renewed his passion for photography in 2010. In 2011, while on a tour to Maldives, he again started professional photography.

Besides photography, he is the corner stone of Paragon, one of the leading business establishments in Bangladesh. He started off with the business of printing press, however, subsequently, he went on to study the know-hows of agriculture and started poultry business. Apart from business involvement in solar power plant, export of shoes, fisheries and plastics, he conducts the business of dairy farming in own farm.

In terms of photography, Moshiur Rahman believes that mere effort is not enough. It is necessary to have a synchronization with the subject. He reminisces of the places he had travelled to, when he was young and didn't have a camera; but the images of moments in those places still seem to be the most beautiful.

Moshiur Rahman's passion and dedication towards photography became evident while in class ten. On a visit to India, he witnessed the dance of a peacock. Amazed at the stunning display of colours and beauty, he had made up his mind that he would capture the beautiful moments in the canvas of photographs for people to see such beauty. Thereafter, he travelled to Taj Mahal and took photographs. Now, he finds pleasure not only through his travels but also in taking pictures of such travels. His wife accompanies him on his travels and encourages him more in his photographic endeavours.

PHOTOGRAPHY & PASSION

Photography is my passion and this passion for photography stems from the desire to capture a moment in time, share the beauty of the world and the ability to narrate the story of life:

A MOMENT IN MEMORY

A photograph lets you capture a moment forever. There are many moments that make our life memorable; and to etch those memories in the canvas of our life, a photograph lets us relive those moments with fondness and to share those moments later with our dear ones.

BEAUTY OF THE WORLD

Beauty lies in the eyes of the beholder. Once you start noticing details, you inevitably start to appreciate how much beauty is all around you. The beauty, the world has to offer, lies in the most ordinary or unexpected of places. Nature's beauty can be found through its amazing landscape and wildlife. Beauty is also depicted in the splendour of man-made structures. Thus, a photograph lets you to know and appreciate the wonderful wonders of the world.

NARRATING A STORY

Photography is a wonderful story-telling medium. A photograph tells a story, a story of people, cultures, festivities, places, nature and wildlife; in short, it narrates the story of life and living. The possibilities seem to be endless. Just ask yourself what story you want to tell, and photography will help you in narrating that story.

GALLERY

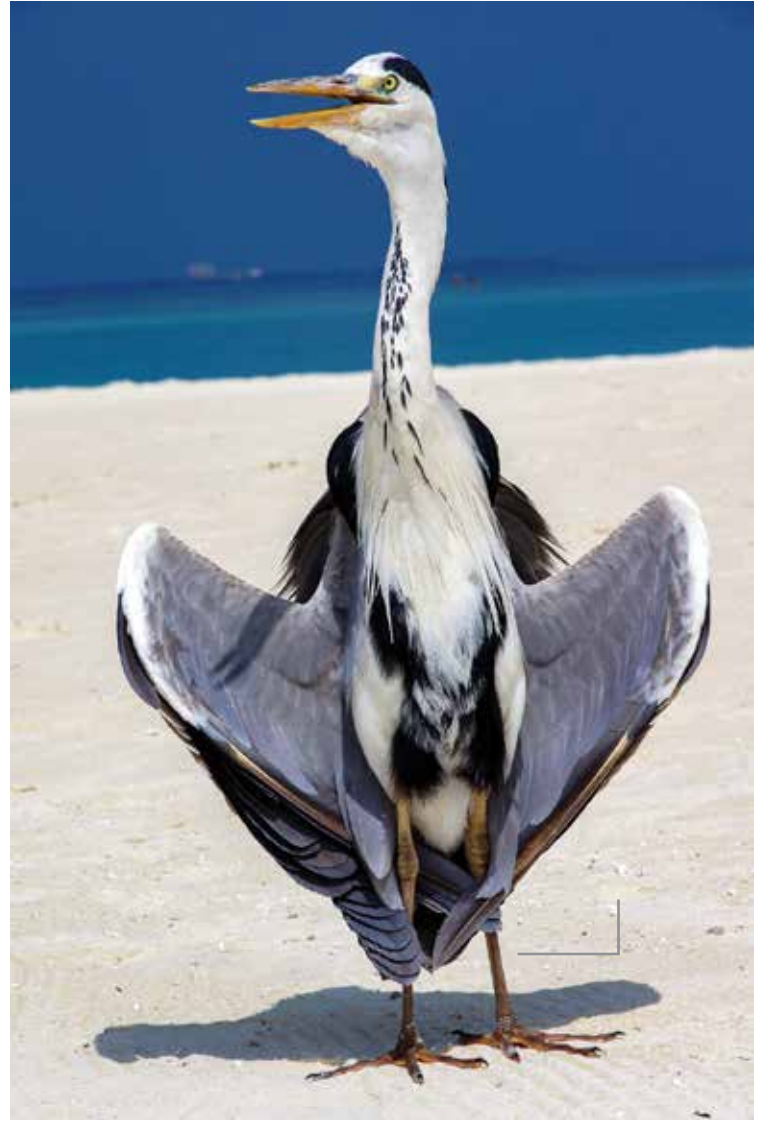

WILDLIFE

PLACES

PEOPLE

December, 2011

Baa Atoll, Maldives

Baa Atoll is a circular coral reef island. Every year, many tourists from around the world visit this place for its exquisite natural beauty.

December, 2011

Baa Atoll, Maldives

The calming seagull was walking along the beach enjoying the warm water clashes under the bright sun.

Iguazú Falls, Brazil

August, 2012

Iguazú Falls, also known as Iguaçu Falls is located on the border of Argentina, Brazil and Peru. This waterfall divides the Iguazú river into three.

August, 2012

Iguazú Falls, Brazil

The day was bright, the water was glistening and the moment was perfect. My mind could not cease to wonder how earth can bring such beauty with the reflection of light. I was blessed to have caught this moment with my eyes and experiences such serenity.

Iguazú Falls, Brazil

August, 2012

A greater angle of the never endless falls. A moment of self-reflection was a natural reaction when being able to capture this monument born of nature's creativity.

August, 2012

Iguazú Falls [Park], Brazil

The falls bring an excitement of wildlife that I was able to explore because of the protected area in the valley of the Iguazu River. This area was created to preserve the waterfall and the creatures that inhabit around the environment.

August, 2014
